

Essay Form

Student Name: Mr. Neungluethai CHALERNPHON

Country: Laos

Theme: The roles of my country and of Asia in the future.

Length: Maximum of 1,000 words

Language: English

Laos is located in South-east Asia, it is one of the long history countries with well-established traditional in Asia, Laos has its own culture, tradition which is quite similar to other countries influenced by religions, Buddhism believe and also nearby countries such as Thailand, Cambodia, and Myanmar, Laos is bordered by Myanmar and China to the north west, Vietnam to the east, Cambodia to the south, and Thailand to the west, and Laos has no border next to the ocean which makes it really difficult for transportation.

At the moment, Laos is still an undeveloped country with a population of only 6.77 million compared to other Asian country, but it is making its way to disengage from undevelopment.

The role of Laos is to become a developed country and is expected to be disengaged by 2020, Laos' ambitious strategies for development are based on generating electricity and selling it to neighbor countries, such as Thailand, China and Vietnam and as well as making connection to those country by planning of four new railways, along with mining section.

Laos has been referred to one of East Asia and Pacific's fastest growing economies by the World Bank, with annual Gross Domestic product (GDP) growth averaging 7.0% for the past decade.

Firstly, students are one of the important keys to make Laos disengage from undevelopment, because as students grow older, they will be the new generation that is in control of our country, so we need to improve our education system, and as Laos is one of the Asean country, so all students must have English as a second language to create connectivity between our neighbor countries. And nowadays technology is something we need to be using more in our teaching system to make students see another side of the world or our education system,

And before that, the process of selecting teachers is also important, because teachers are the ones to improve all students. All school must have quality teachers to teach the students who are going to be the faces of our nation in the future.

Economically, we are able to do many things to promote our economic growth, make people in our country buy internal products so we promote our economy and support our country's manufacturing as well as promoting money flow in our country.

And also, hiring employees or workers is necessary, because good procedures, leads to great end products, leads to better sales, leads to better economy.

But at the moment, there are not much of conveniences in our everyday life in Laos, and as I mentioned earlier,

We will not be able to keep the money flow if Lao people keeps going shopping in other countries and one thing to do is to improve our advertising and marketing, attracting customers is important.

Following by having good places for people to shop or spend time on, such as cafes, malls and so on.

To reach those places, we will need to have better traffic and transportation for instance, they should provide more comfortable taxis, more buses, more convenient road and manage our traffic system. And we need to manage littering so we can keep our environment clean as well.

And what we need to focus more about is our citizen's life Lao people's lifespan is not very high compared to other country such as Denmark and Japan

So, what we need to improve is the hospitals, medical technologies, Doctors so that we can protect our citizen's being.

Another thing is, how we eat, mostly the source of our food we eat every day are from the markets, we need to focus more on selecting food to be sold in the markets and that must be good quality food, organics and so on.

Business cooperation is also one important thing to make, not only we can increase our economic growth but also our friendship to other countries around us.

But I think Laos is an incredible country, I'm proud to be born as Lao people.

Asia is the largest continent in the world, it covers about 30 percent of the world's land area. Asia is also the largest populated continent. We were given the name the largest continent in the world, so we have to make the best out of that, we need to make Asia ^{become} better and better.

And the role of Asia in the future is to become a great continent. There are plenty of ways we can make Asia better.

There need to be connection to every Asian countries so that we can make our friendship stronger, also every country that is located in Asia must be a developed country.

Exchanging between economy, cultures or business is also a very important thing for example, this forum is very helpful, because students from other countries can share, exchange their opinion, thoughts, cultures, language together.

There must not be such thing as racist, sexist, religious discriminating etc. in this beautiful continent because that will only make disharmony and lead to conflict between continent, we all must provide equality to all so that every single person can have somewhere to stand in this community.

Every countries should be able to manufacture their own products for their country's own, use without needing to import products from other continent.

And most importantly, we will not be able to live together without peace, because peace is the thing that brings us all together.

But however, in my opinion, I think my country and Asia is good as it is. I feel very glad, grateful and lucky to be born in such wonderful place and in the future, I hope that I can be one of the leaders to help make this country, this continent, this world a better place
