8

Student Name:

HTET AUNG KO

Country:

MYANMAR

Theme: The roles of my country and of Asia in the future.

Length: Maximum of 1,000 words

Language: English

The roles of my country and of Asia in the future
 "World" is not just only word, it is a symbol of beings' home. In the past, world has created for many reason. But, now, the world is being destroyed by selfish behaviour of human. No prophet can ^{tell} the future of the world, but it is so sure that all result of actions created now will be upon ^{us} in the future.

Since the world is a home for human, it is totally sure that all human will disappear if the world is gone. So, we need to protect the world as a roles of human. Depending upon the human's action, the world's future is controled over. Being largest and most populous continent, Asia plays a vital role in the future's world.

The world is facing with thousands of problem. In 2050, the world population will be ^{doubled}. It means the population explosion will be taken in the world, especially in Asia. It will lead to pollution, adversities of the world.

Natural resources, ~~some~~ can be produced energy, but they are limited resources. In each and every countries, the population

explosion has been occurred, and energy requirement increase year by year. Using natural resources is not good enough as renewable resources; solar, wind and etc. In Asia, the invention of technology reaches climax, and scientists try to solve the problem of energy requirement. In the future, the roles of my country and Asia will play an essential roles.

Deforestation is the main problems to solve in Asia in the future. For settlement, forests are cut^{down} in thousands of acres. If we can't make stop deforestation, it leads the world to havoc. The roles of Asia, including Myanmar is to recreate forest and to stop cutting down trees. If it can't be, the future generation will face with lots of damage and disorder.

Technology is the best weapon to destroy monsters of damage. Asia is not enough to improve technology comparing with western countries. But, the roles of technology deal with the world's issues. Solar technology can solve the problem of pollution from resources. Other technology can solve the difficult questions of the world.

There is a saying; "Technology is the king of weapon". Asia including Myanmar's roles are to make improvement of technological production. If we die, the next

generation will take our places. All things we can do now is to give extraordinary technology to our sons, to our next generations

Around 60% of human live in Asia and it means Asia is rich in human resources. If technological helps have been added to them, they become extraordinary beings to protect the world's havoc. So, Asia including Myanmar need to prepare how to solve the future's greatest problem.

We need to make youths to be interested in technology. We need to show off how amazing technology is, how can we prevent our environment with technological help, and what will happen without technology. All human have to know about that. We can't fight alone. We should fight together, we should fight back with weapon ^{called} technology. It is the roles not only for Asia but also for the whole world to destroy every problem in the future.

"Human beings are born to die, but the world is born to renew, not to destroyed". Each person, each country plays a vital role in each issues of the world. In many case, the role of every human is to protect our next generations to protect our beloved world. I'm born to serve the world. So, I have to protect the world. Let save the future world with technology, unselfish^{ness} belief, and using our difference together!
