

Name	Maki Imada
Country	Japan (Oki-Dozen High School)
Title	To tell about jobs for students
Objective	To make a poster and to tell about jobs for my school students
Outline	I thought to tell about jobs is useful in the future. Many students can't find their own goal or their dream in the future, so they can't motivate to learn.
Actions taken & result	I checked about occupations. I will publish the poster after the final report.
Reflection from TYCA	<p>"Are they really same age as me? " This is a first question when I spoke with the TYCA students. I was surprised by it because they spoke to everyone without feeling shy.</p> <p>Through TYCA, I realized the importance of languages. We can't make a good conversation without speaking the same languages. English is a second language for TYCA students, but all of them can speak English fluently. I was very surprised.</p> <p>There are many people who have been learning English for a long time at school, but most of them still can't speak fluently around me. I was also one of them. Before TYCA, I didn't think it as a bad thing, but through TYCA, I realized that not able to speak English can make a conversation very hard to understand.</p> <p>I also realized that the important of challenges. I was impressed by the students on how they face the challenges while joining this summit across boarder and also while talking to the foreigner as well. In addition to this, I'm also impressed by their attitude on TYCA's task. For example, when we got a chance to ask questions to the lecturer, the students tried to ask many things. Maybe it is not so special for them, but for me, I think it need a lot of confidence. Their attitude of trying to do everything has awaken me.</p> <p>TYCA told me the importance of languages and challenges. Above all, I can make many friends because they are very precious to me. Hence forth, I will continue the activities which I wrote in Midterm-Report. I will study English more and, I want to become a human being who can help many people in the future.</p> <p>It is my valuable experiences to have it learned through TYCA and experienced it with TYCA's students.</p>
